BA CERTIFICATE IN HEALTH COMMUNICATION

Learn to create, analyze, and
assess health messages across
a variety of settings

ABOUT THE CHC

This 15-credit Certificate in Health Communication (CHC) serves as a gateway for health care-related careers, internships, and opportunities. Students will learn major theoretical and methodological approaches to health care communication, how to create and assess health messages, and how to use storytelling to design messages and campaigns with communication knowledge and skills.

FACTS ABOUT CHC

- ✓ Officially available fall 2019, but courses taken before then can count toward requirements.
- ✓ In Spring 2019, COMM 4710 Designing Health Messages can count for 4575 class.
- ✓ Health communication is a growing field with many job opportunities.

3 Required Classes

COMM 2500 Health Communication
COMM 4500 Advanced Health Comm
COMM 4575 Designing Health Messages

1 Health Elective

Choose from a wide variety of interdisciplinary health classes

1 Health Capstone

Choose an internship related to health care communication, a health communication-related service learning class, or another high impact health communication practice class to apply your knowledge and skills to health care settings.
