LORD VADER WANTS YOU…

…to know about a new course: *From Killer Apps to Killer Bots: Technology and Social Change* (Sociology 1050). *From Killer Apps to Killer Bots* examines the multiple ways in which technologies like mobile phones, social networks, computers, cars, and TIE fighters 😊 impact society and how those impacts vary across racial, ethnic, gender, economic, and biological groups. Whether you are an incoming student not quite sure what you want to focus on or an engineering major ready to build the next death star, you will find the content of this course stimulating.

From Killer Apps to Killer Bots is an online course and has no prerequisites. It is open to all students. Register today! Or contact Keith Guzik (keith.guzik@ucdenver.edu), instructor for the course and aspiring doctor of the dark arts, with any questions you may have.
