

With an ALEKS Placement Score of 76 or greater you are eligible to enroll in Calculus.

The Department of Mathematical and Statistical Sciences offers two options:

- MATH 1401 – Calculus I (a one-semester course)
- MATH 1399 and MATH 1400 – Stretch Calculus Parts A and B (a two-semester course sequence)

If you need help deciding which is a better fit for you, start by answering the question(s) below.

### Question 1

While taking the ALEKS placement, did you use a calculator, notes, computer technology, or other outside resources to assist you in solving the problems?

If Yes – We recommend taking MATH 1399

If No – Go to Question 2

### Question 2

Without a calculator, are you comfortable manipulating algebraic expressions, equations, and functions such as linear, quadratic, polynomial, rational, exponential, logarithmic and trigonometric (in both degree and radian angle measure)? This includes factoring, solving, graphing, evaluating, and working with fractions.

If Yes – We recommend taking MATH 1401

If No – We recommend taking MATH 1399
