## **PHILOSOPHY**

### **PHIL 5101 Pragmatism: Classical American Philosophy**

**Call No. 35623**

**001-LEC Tu 5:00PM - 7:50PM REMOTE**

**David Hildebrand**

Perhaps the three most important questions for our nation of immigrants have been: Who are we? What do we believe? Should we accept the views of earlier generations? In addressing these questions, American philosophers have both accepted and rejected different pieces of their intellectual heritage (especially Descartes, Hume, Kant, Hegel, among others). In their most critical moments, American philosophers argue that philosophy must reassert itself as an active, constructive, and ethical force in human life. Doing this means shaking and breaking many traditional philosophical distinctions including those between: mind and body, fact and value, appearance and reality, self and society, probability and certainty, and language and world. We'll examine important philosophical themes developed and sustained by both classical and neopragmatists, spanning the 19th, 20th, and 21st centuries. Philosophers likely to include Charles Peirce, William James, John Dewey, Jane Addams, Alain Locke, Richard Rorty, and Hilary Putnam. Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4101, SSCI 5101, HUMN 5101. Max hours: 3 Credits.

### **PHIL 5300 Philosophy of the Mind**

**Call No. 35620**

**001-LEC Mo 5:00PM - 7:50PM REMOTE**

**Candice Shelby**

With Descartes' famous "cogito ergo sum", the question of mind per se became a hot topic of philosophical discussion. More recently, over the past 150 years, the increasing influence of Darwin's dangerous idea (to borrow Daniel Dennett's phrase), has resulted in rising scientific as well as philosophical interest in the question of the mind's connection to the brain. Is the mind caused by the brain? Is the mind just the sum of the brain's activities, or some subset thereof? If

so, what is that nature of those activities? Are brains computer-like, or is the analogy misguided? What about consciousness? How does one explain something like that in physical terms? Consciousness seems to be categorically different from the physical, as does intentionality (the aboutness or directedness, of consciousness—how does that happen?). What about the minds of animals other than humans? Can we say anything about those? And what about rationality, the cornerstone of Philosophy? Are humans really rational in the way that we think we are? If so, what is the role of emotion in our mental lives? This course will address all these questions and numerous others, from a variety of perspectives. Thus, you can expect exposure to metaphysics, epistemology, neuroscience, computer science, and more! This is a 3-credit course that does not fulfill any Core Course requirements. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4300. Max hours: 3 Credits.

The course pays particular attention to the diverse ways that "feminism" has been and continues to be conceptualized over time. It also addresses issues of intersectionality by examining how categories like race, class, and ethnicity, intersect with gender, sexuality, and sexual identity. Prereq: Graduate standing. Cross-listed with ENGL 4308, PHIL 4308, PHIL 5308, WGST 4308, WGST 5308. Term offered: spring. Max hours: 3 Credits.

Further, students will become familiar with deductive logic of syllogistic, sentential, and propositional types, and learn to employ several techniques for determining the validity or invalidity of arguments in both ordinary language and in symbolic form. Finally, students will learn to employ specialized philosophical tools, such as thought experiments, concept analysis, and linguistic analysis, for use in developing and defending philosophical arguments.
