Also, please describe or provide a link to program admissions policies that allow students to enter with credit for prior graduate work, and the expected implications for time to completion. Please indicate NA if not applicable:

A maximum of 24 credit hours of transfer course work may be applied toward the doctoral degree though the program does not guarantee that any transfer credits will necessarily be accepted. Decisions must be made on a course by course, case by case basis. Transfer credit is defined by the Graduate School as any credit earned at another accredited institution in the United States, or credits earned as a non-degree student within the University of Colorado system. All transfer courses must meet the following criteria: (1) The courses are recommended for transfer by the Program Director, the course instructor(s), and the student's primary advisor for transfer and are approved by the Graduate School Dean; (2) The courses are graduate level (5000 or above); (3) The student received a grade of B or better (no pass/fail or satisfactory/unsatisfactory grades are transferable); (4) The courses were completed within five years of the student's request for transfer; (5) In some instances the Program Director, course instructor(s), or student's primary advisor may accept the transfer of credits only if additional requirements are satisfied that demonstrate the student's competence in the subject matter under consideration. Determination of these requirements is at the discretion of the Program Director, course instructor(s), or student's primary advisor and will be decided on a case by case basis.
